

ENVIRONMENTAL POLICY

The Housing Executive's environmental policy is to ensure that all of its activities and decisions make a positive contribution to sustainable development across Northern Ireland.

The policy is publicly available on the Housing Executive's website. Concern for environmental conditions and best use of resources is part of our business strategy.

OUR POLICY IS TO:

- maintain an independently certified environmental management system for the Housing Centre
- remain committed to compliance obligations and continual improvement
- train all staff in sustainable development awareness and provide specialist training as needed
- apply the reduce, re-use, recycle approach to waste streams
- protect the environment to prevent pollution to the air, land and water
- support and implement initiatives to develop sustainable local communities
- aim to encourage and influence customers, suppliers and 3rd parties to protect the environment and promote sustainable resource use
- enhance and protect biodiversity and ecosystems for our tenants across all Housing Executive landholdings
