Notes:

- This response is based on the most recently published data (allocations up to 30/06/2024).
- When a question of “average waiting times” or “average points” is asked MEAN and MEDIAN averages are provided.
Reasons for this include:
 - The MEAN is the arithmetic average and as a statistic can often be unreliable, having been skewed by significant outliers, i.e. applicants who have been on the waiting list for a number of years.
 - This degree of skewing makes the arithmetic average, the MEAN, unreliable. Therefore, following expert advice on this matter a methodology that utilises the MEDIAN (a measure of central tendency) as a more reliable indicator in relation to Waiting Lists and Allocations is also provided.
- Allocations data is a rolling 6-month total and includes allocations to both Housing Executive and housing association properties to applicant households.
- <10 are cases where numbers are less than 10.
- UK GDPR and Data Protection Act 2018 - It is important to note the GDPR & Data Protection Act 2018 regarding the potential risk of identifying individuals and individual households. Guidance from NISRA suggests that equality monitoring information should not be disclosed in sensitive cases where individuals or individual households could be identified. Also the Information Commissioner's Office (ICO) 'Anonymisation: Managing Data Protection Risk' Code of Practice states 'where less than 10 responses have been given to an answer that identifies something factual, all variables relating to that question have been suppressed'. However, 'it should be noted that attitudinal questions are not bound by this rule, in addition to responses of 'Don't know', 'Refused', 'Other' or similar. As the information provided is considered sensitive some statistical disclosure controls may have been placed on the tables with the omission of data in cases where there are less than ten Applicants.
- Please note that in the interest of Data Protection we have had to remove the points and months for some CLAs where there were less than 10 allocations and where the points & months were substantially different (we used a deviation of 20%) from the overall N. Ireland mean average.

This concludes our response.
