**Our Ref: FOI 605**

## **Request**

We received your request on 21 November 2024 for the following information:

*The number of applicants (household level) on the waiting list for each of the listed CLAs (in Tables 1 and 2) including first preference and 2nd preferences.*

Your request has been handled under the Freedom of Information Act 2000 (FOIA).

## **Our response**

The tables below provide data on the number of applicants on the waiting list in the requested Common Landlord Areas (CLAs) as at 30/06/2024 & allocations from the waiting list for a 5-year period from 01/07/2019 to 30/06/2024, broken down by Ethnic Origin (Table 1) and Religion (Table 2).

The tables provide two different ways of summarising waiting list data:

- 1) listing all applicants who selected the requested CLAs as one of their areas of choice (applicants may have multiple areas of choice in addition to their 1<sup>st</sup> preference), with each individual applicant household possibly appearing in multiple CLAs (bespoke report from the Housing Management System to meet your request, resulting in high numbers of overlapping/duplicate counts)
- 2) listing applicants based on their 1<sup>st</sup> area of choice, with each individual applicant household appearing in the breakdowns only once (standard report from the Housing Management System, no overlapping/duplicate counts).

The totals for each CLA in the first breakdown are not mutually exclusive, as respondents could select multiple areas of choice. Therefore, the combined totals of figures in the first breakdown **would not** represent the total number of unique applicant households.

Additionally, it must be noted that that numbers of applicants on the waiting list for a CLA does not equate directly to Housing Need in that CLA.

The tables must be viewed in conjunction with the accompanying notes.

### Notes:

- Waiting List data is a snapshot of the waiting list as it was on the last day of the specified quarter, in this case 30/06/2024.
- The bespoke report from the Housing Management System that lists all applicants who selected the requested CLAs as one of their areas of choice is based on the list of unique active applications as at 30/06/2024. However, areas of choice selection is part of our live system which is updated on an everyday basis. The CLA choices for the unique active applications as at 30/06/2024 were processed and finalised on 05/12/2024. As some applicants might have adjusted their selection between the two dates, there might be minor discrepancies between the calculated totals. However, the differences are minimal and have no significant statistical impact on the data provided.
- Allocations data is a rolling 5-year total, in this case allocations from 01/07/2019 to 30/06/2024.
- The tables show Waiting List & Allocations data in the requested Common Landlord Areas (CLAs) only.
- UK GDPR and Data Protection Act 2018 - It is important to note the GDPR & Data Protection Act 2018 regarding the potential risk of identifying individuals and individual households. Guidance from NISRA suggests that equality monitoring information should not be disclosed in sensitive cases where individuals or individual households could be identified. Also, the Information Commissioner's Office (ICO) 'Anonymisation: Managing Data Protection Risk' Code of Practice states 'where less than 10 responses have been given to an answer that identifies something factual, all variables relating to that question have been suppressed'. However, 'it should be noted that attitudinal questions are not bound by this rule, in addition to responses of 'Don't

know', 'Refused', 'Other' or similar'. As the information provided is considered sensitive, some statistical disclosure controls may have been placed on the tables with the omission of data in cases where there are less than ten Applicants.

- <10 are cases where numbers are less than 10.
- \*Totals minus cases where numbers are less than 10; the totals marked with an asterisk have been harmonised between the two tables (higher of the two values is used in those cases where cross-referencing the tables would remove statistical disclosure controls).
- The figures have been drawn from an administrative IT system (Housing Management System) which, as any large-scale recording system, may contain data entry errors.
